

# GOGREEN PLUS FLEX OPTION

## THE TAILORED WAY TO REDUCE YOUR CARBON FOOTPRINT

GoGreen Plus reduces emissions of carbon dioxide & other greenhouse gases through investments in green transportation technologies & fuels in our DHL Freight network (carbon insetting). The GoGreen Plus Flex Option is a three-tiered model that offers you a new, flexible way to reduce carbon emissions by way of insetting, allowing you to choose according to your carbon reduction targets and budget. To take part in this green initiative, you can book shipments with a price premium which is entirely invested in green road transportation. You will continue to receive the highest reliability and priority for your shipments, while also helping to save our planet.

Green. Flexible. Reliable.

**DHL Freight – Excellence. Simply delivered.**

In a sustainable way.

   @dhlfreight

# OUR NEW GOGREEN PLUS FLEX OPTION EXPLAINED

GoGreen Plus Flex is our flexible carbon insetting option helping to decarbonize road transportation according to your carbon reduction targets and budget. Unlike carbon offsetting, investments are undertaken in green technologies & fuels in the transport network and not in projects in other sectors. The flexible carbon insetting feature can now be added to our DHL Freight core products throughout Europe. Benefit from a transparent climate-neutral service while having access to all the existing benefits of our products.

DHL Freight signs agreements with carriers in our network who invest in more costly clean technologies within their own fleet or agrees with partners to invest in such technologies.

DHL Freight matches your shipment with our green capacities, and the price premium is entirely invested in the cost delta for climate-smart transport solutions.

Transportation is being undertaken using Bio-LNG / CNG, HVO, hydrogen, or battery-electric transport.

For quality assurance, the program will be audited by an external agency. Vehicles and fuels are monitored to ensure that at least as many tons of CO<sub>2</sub>e are reduced as the total sum of insetting capacities ordered by customers.

## THE GOGREEN PLUS FLEX OPTIONS AT A GLANCE\*

	Core Products without GoGreen Plus	BASE	SMART	PREMIUM
<b>Insetting amount</b>	0%	10%	30%	~ 100%
<b>Less emissions during transport</b>	✗	🌿🌿🌿	🌿🌿🌿	🌿🌿🌿
<b>GoGreen Plus Carbon Report</b> on a monthly basis	✗	✗	✓	✓
<b>Certificate</b> issued retroactively for the previous year	✗	✓	✓	✓

## YOUR BENEFITS WITH GOGREEN PLUS FLEX OPTION AND DHL FREIGHT'S KEY PROMISES

- ✓ **Improved carbon footprint**  
Customers decrease their carbon footprint where emissions are generated and not with projects in other sectors.
- ✓ **Green reputation**  
By communicating their green choice to their customers, employees, and shareholders, DHL Freight's customers can increase the value of their business
- ✓ **Full flexibility**  
With the three different options customers have the full flexibility to choose the insetting amount that fits to their carbon reduction targets and budget
- ✓ **Full reinvestment in green technologies**  
Premiums are fully invested in green transportation technologies – where it is efficient and fits with operations
- ✓ **Reporting and certification**  
We are transparent about inset emissions and used technologies, offering carbon reports and certifying the amount of emissions inset
- ✓ **Full service offering, easy to book**  
We take care of all implementation aspects, along the vision that booking green transportation is as easy as buying green electricity
